Art Unit: 1742

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 9 and 10 , drawn to superalloy composition, classified in class 148, subclass 426.
 - II. Claims 11 to14, drawn to method of producing a superalloy by compounding an Ir-based superalloy containing at least one metal from the group consisting of Ti,Zr,Hf, V, Nb and Ta, and a Rh-base superalloy with at least one metal selected from the above-described metal group of said metals with Ni and optionally Al followed by ingoting , classified in class 148, subclass 538.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group II and group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the superalloy can be made by casting all the alloying constituents together.

In remarks submitted December 8, 2003, Applicant requested that a written restriction be provided rather than carrying the election in the parent application over to the present continuation application.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
